

## SOMEONE'S “ORBIT” EXHIBITION

*I wanted a name that said: 'Don't worry about who I am. Just check out what I make. It's really much more interesting.'*

'Someone' is the Amsterdam based multi-disciplinary artist Tessa Rose Jackson. She celebrates and explores creativity in all its different forms. Having always harboured a love for art of all disciplines, Tessa discovered a joy in crossing borders between genres, collaborating with other artists and putting ego and image aside to focus on simply 'making'. The result is a constant flow of work that, although diverse in format, is held together more by mind set.

For her upcoming EP release 'Orbit', Someone wants to explore the intensity with which art and music can be fused, in a way that they enhance each other fully. The plan is to create an interactive Augmented Reality exhibition that combines Someone's psychedelic music with cutting edge technology and hypnotic art.
